<Even> Semester Year <2022/2023>	

- **Project Title**
  RAAMEN

- **Introduction**

  RAAMEN is a web-based online ramen selling application. It is a great place for buyer to buy ramen and for seller to sell their shows. The CEO of **RAAMEN** wants to hire your team to build this application. Before working there, you are given an assignment to make a simple version of this application. You may find some features which don't make sense. But remember, it is just an assignment to improve and test your skill.
